Cumberland County now accepts cartons for recycling

Millville, NJ: The Cumberland County Improvement Authority continues to lead the way in recycling and now accepts cartons mixed with bottles and cans for recycling. "Working in partnership with our municipalities Cumberland County is number #1 in New Jersey," said CCIA Board Recycling Chairman, Jose Velez. Now the last drop of milk, juice or soup does not mark the end of a carton's useful life. The Authority has partnered with RE Community Recycling to process its bottles and cans and this new material has been added to the collection stream.

"It is simple, just place your empty cartons in your red recycling bin with you plastic, metal, and glass containers," said Dennis DeMatte, CCIA Recycling Coordinator. The material will be sorted at the recycling facility and sent to a mill to be made into recycled paper products and even building materials.

Examples of these containers include shelf stable cartons for juice, milk, soy milk, soup, broth, and wine. In the refrigerated section you can also recycle milk, juice, egg substitute containers. Make sure they are empty, remove any straws, and give them a quick rinse before placing them in your recycling bucket.
